Asterix

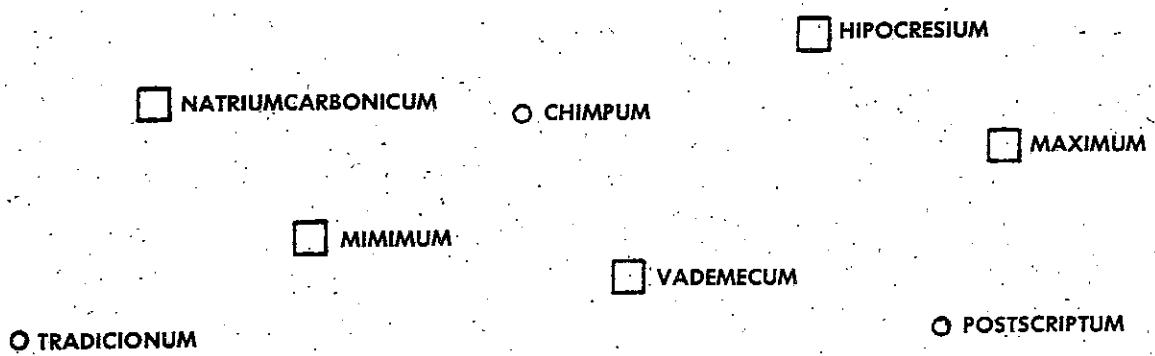

Y LA

CENTRAL NUCLEAR

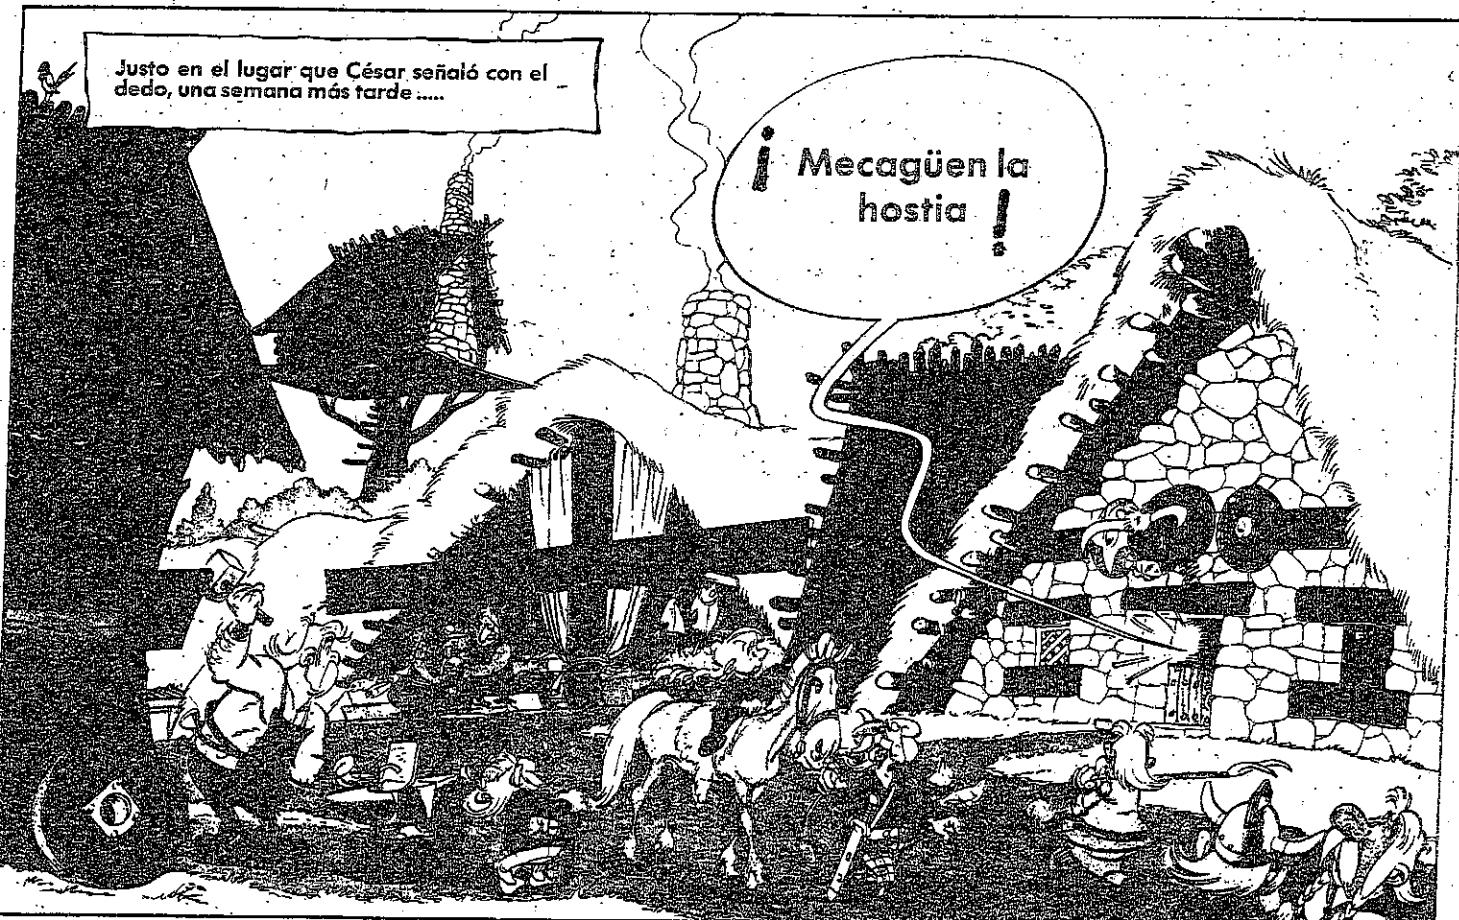

Nos encontramos en el año, en el año ... pues en que año iba a ser? Tampoco es tan fácil saberlo, pero una cosa está muy clara: que el país está en manos de los poderosos. Todo el país? No! porque allí donde hay opresión, hay también resistencia. Y de esto trata nuestra historia

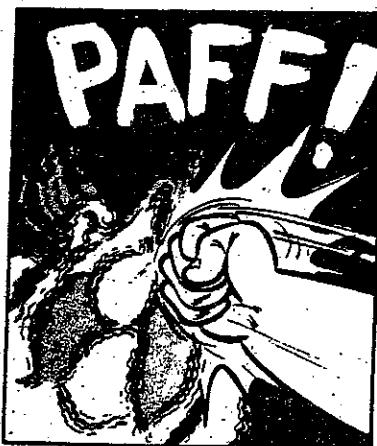

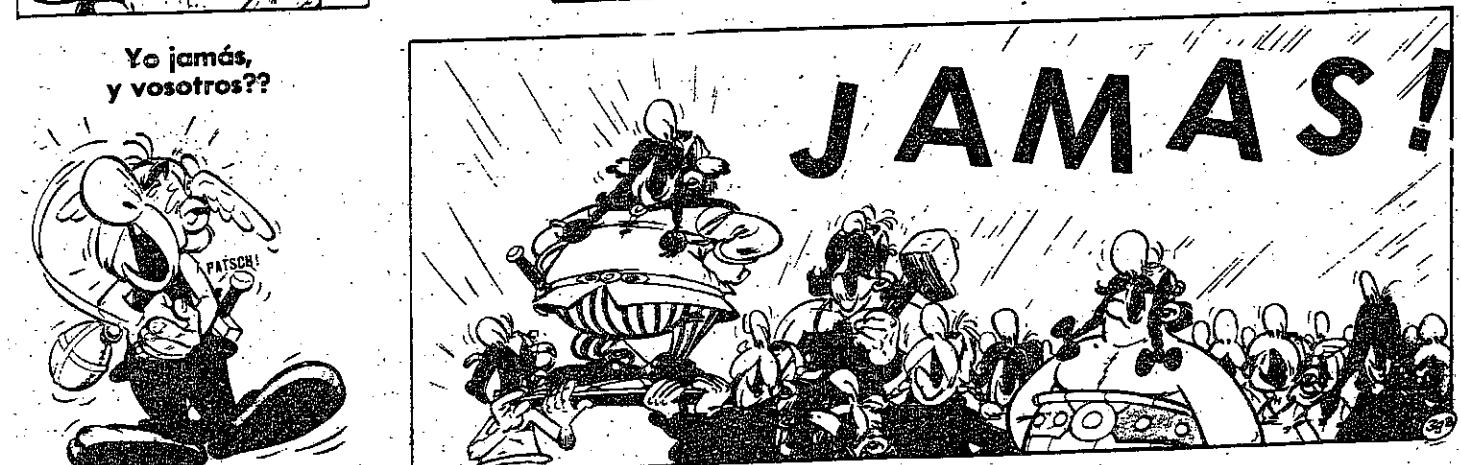

Haz el favor de no repetir todo dos veces, porque me sacas de quicio. Basta con que lo digas una vez, te enteras? Basta con que lo digas una sola vez!

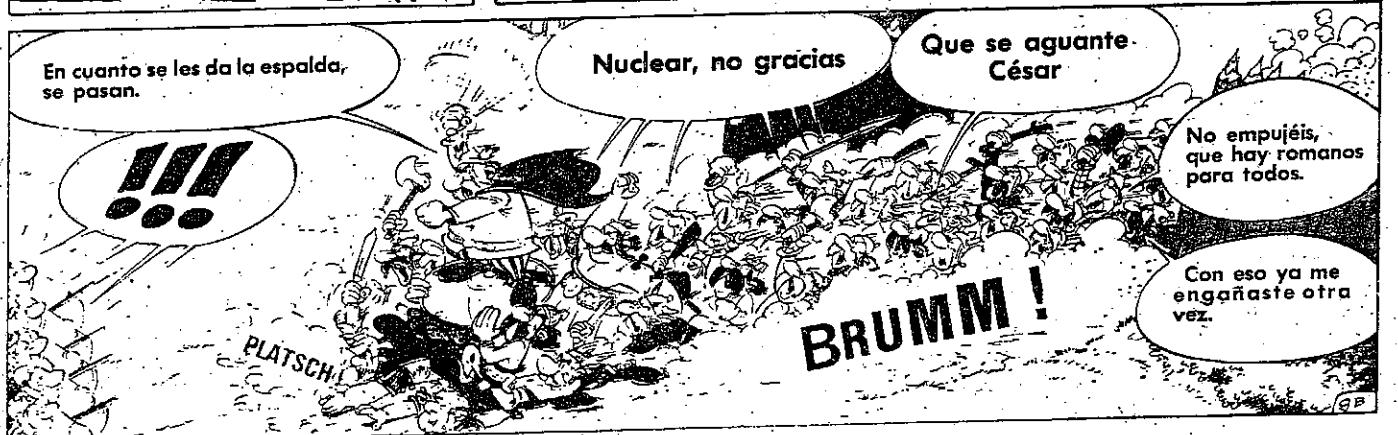

Hemos de estudiar ahora el asunto de la opinión pública. Mi slogan es: "que nadie nade en contra de la corriente atómica".

Pero primero habrá que limpiar la zona de obras con una legión de Grisunespecialum, y luego comenzamos a construir. Para discutir ya tendremos tiempo.

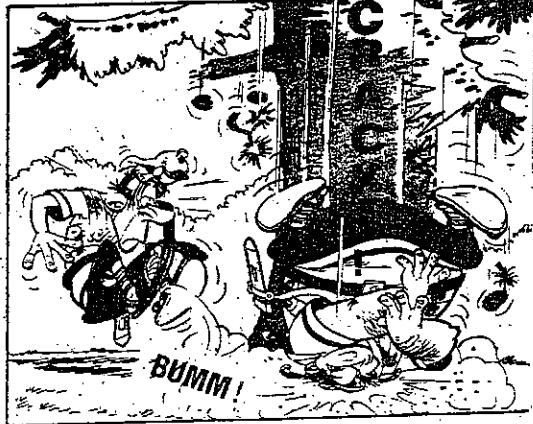

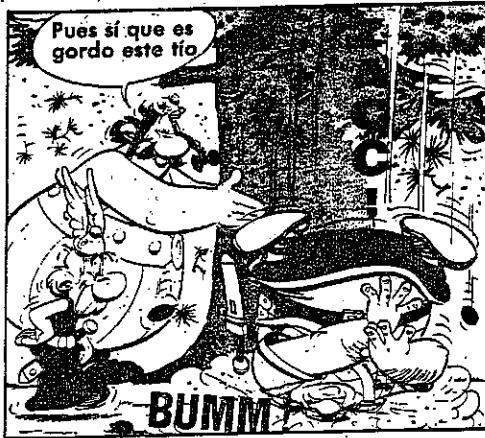

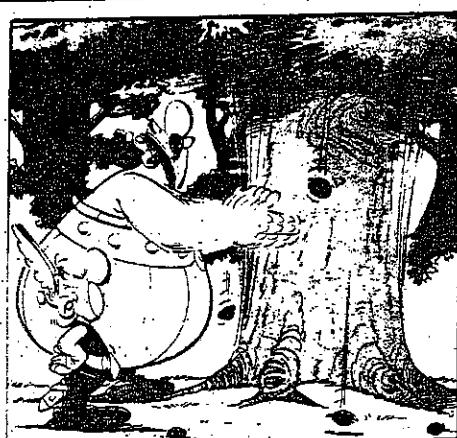

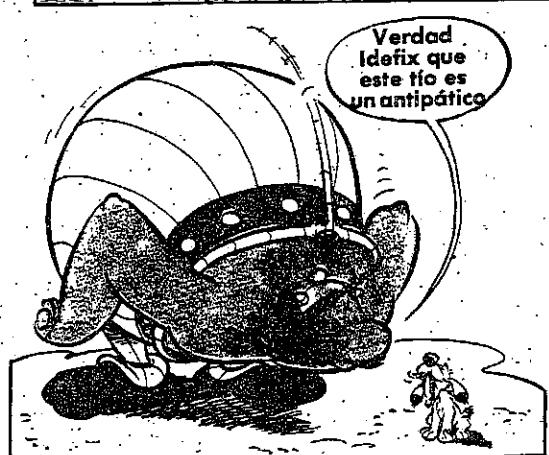

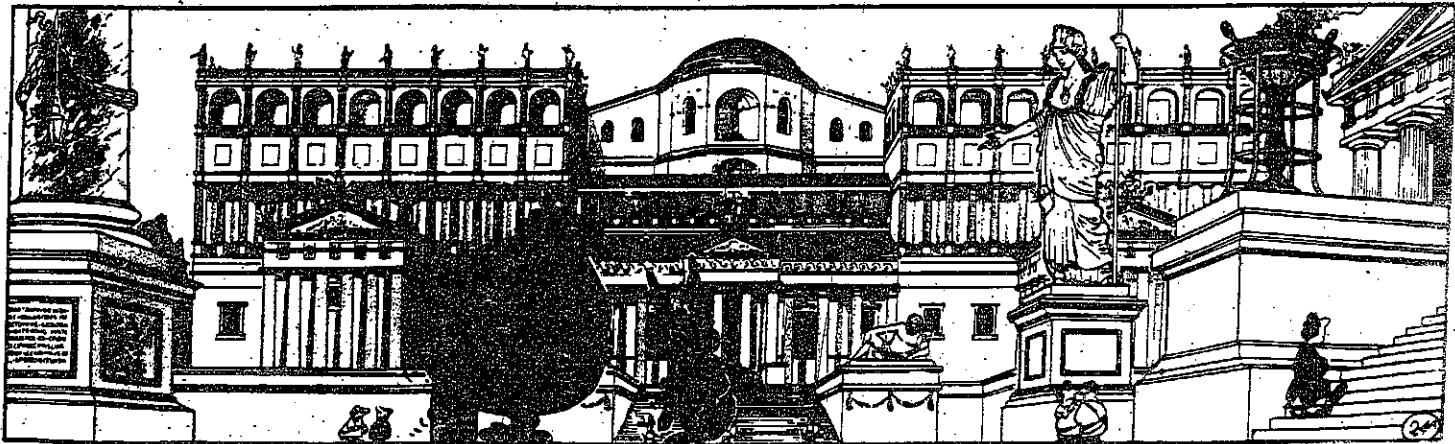

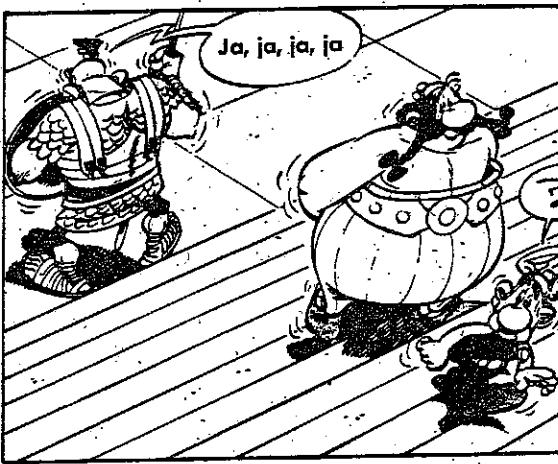

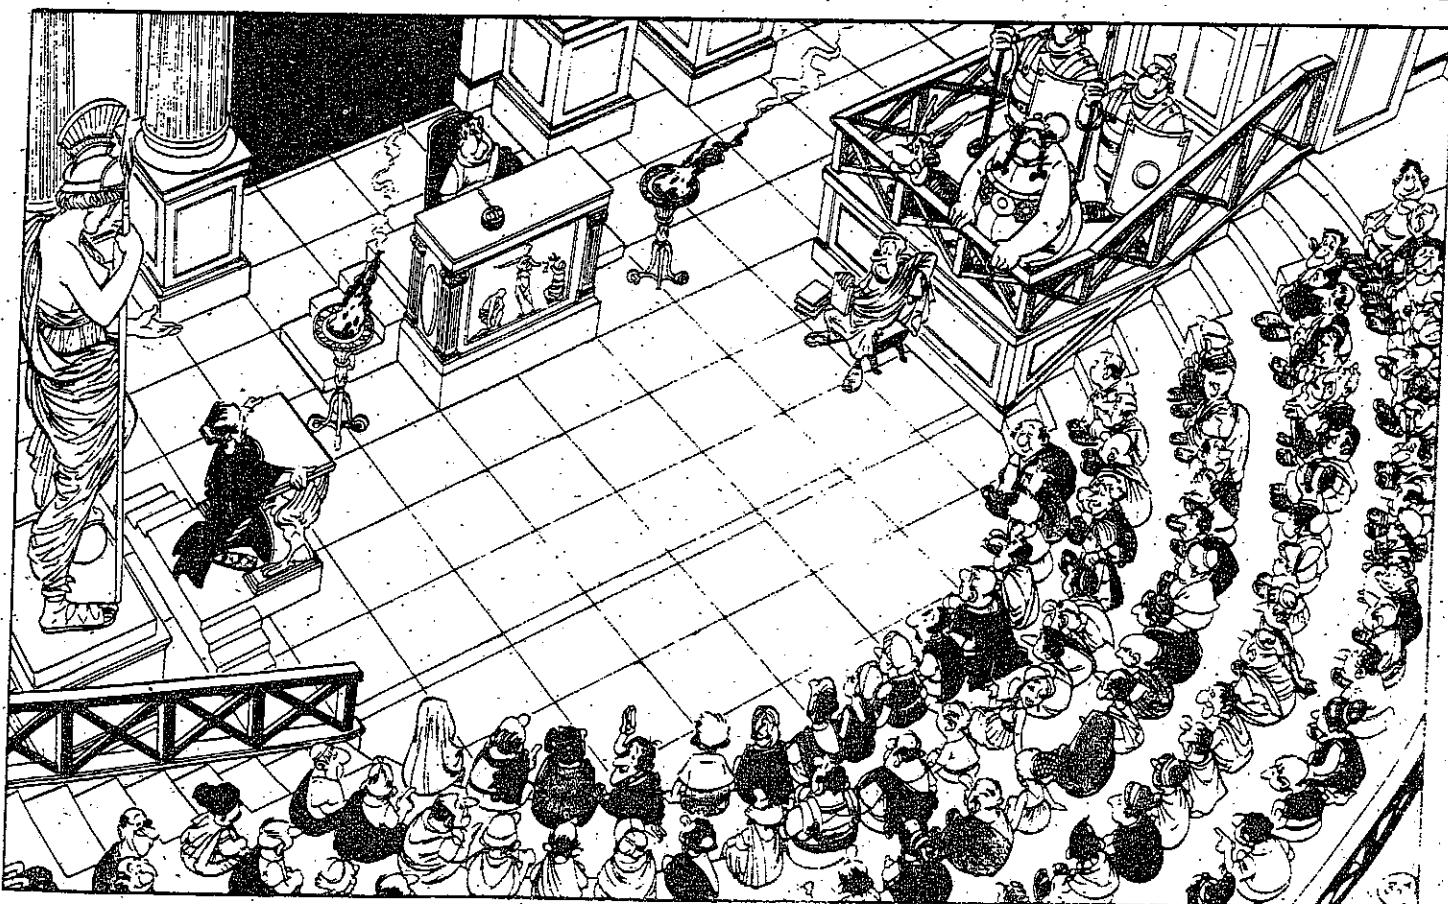

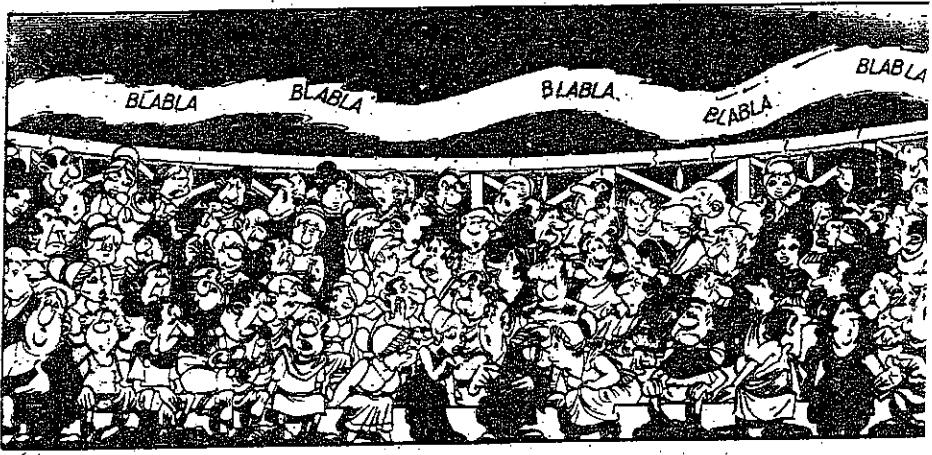

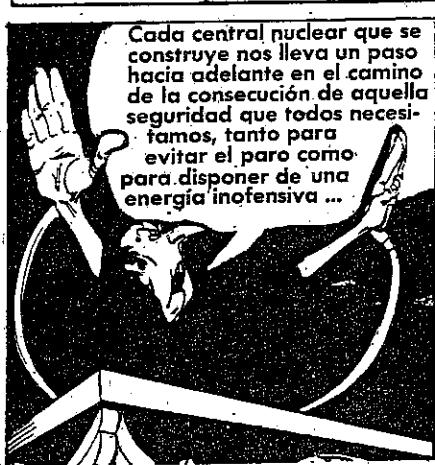

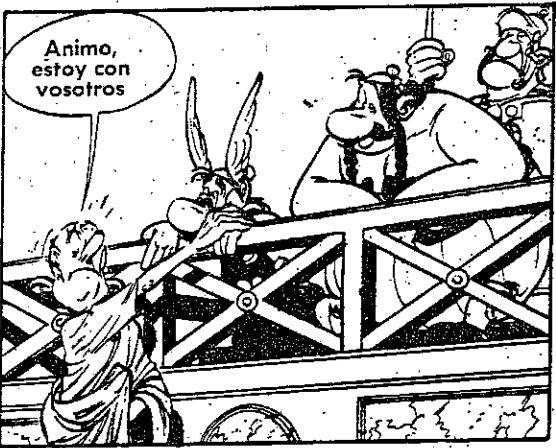

*En Alemania las "chinchillas" son aparatos muy pequeños, que colocan en el interior de los pisos para escuchar las conversaciones de gente sospechosa.

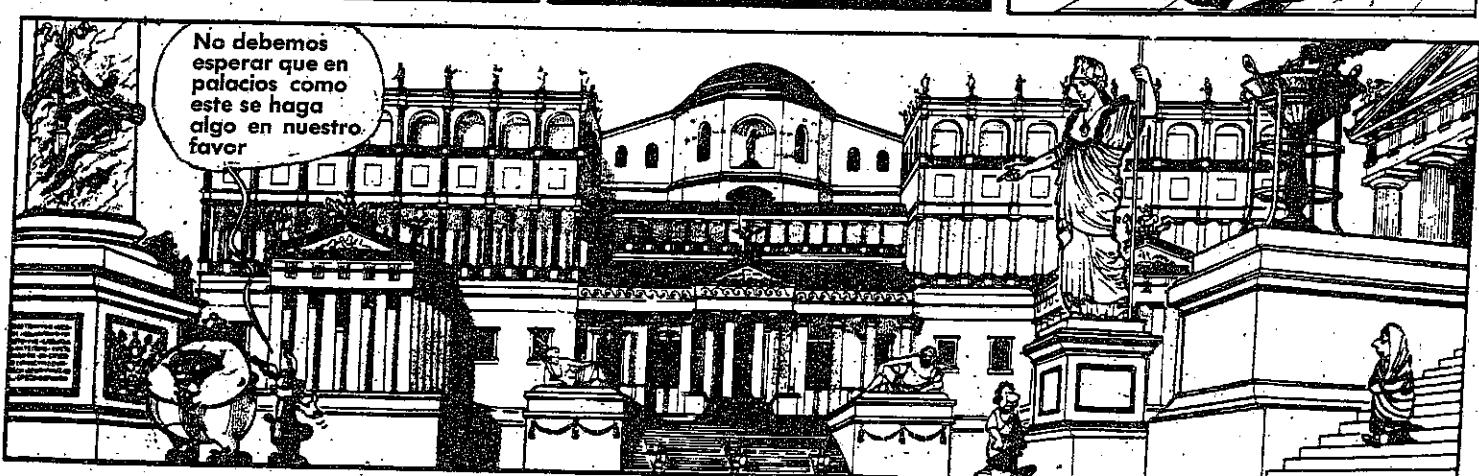

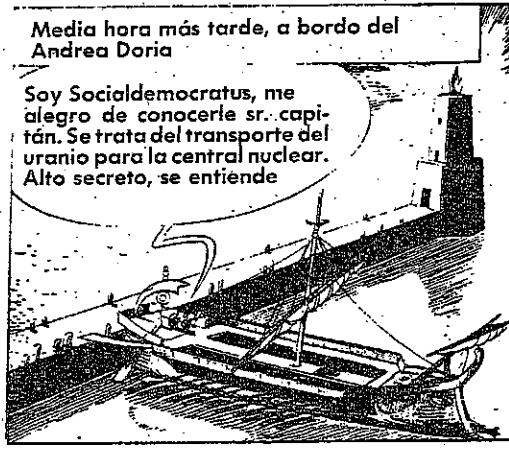

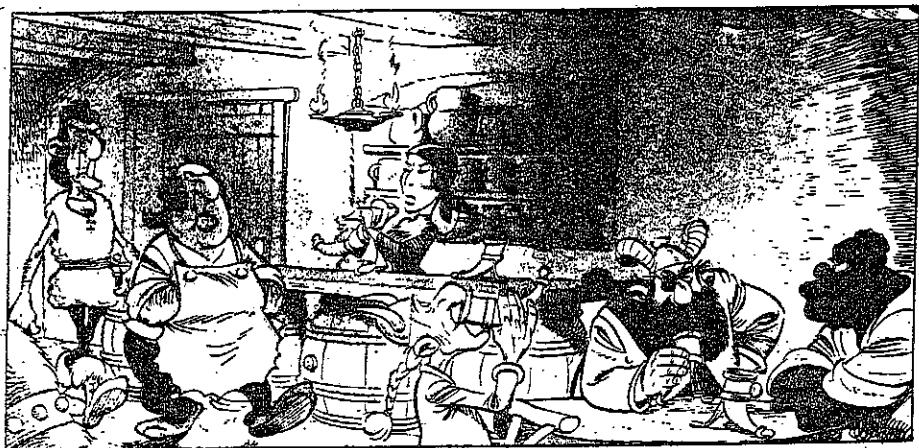

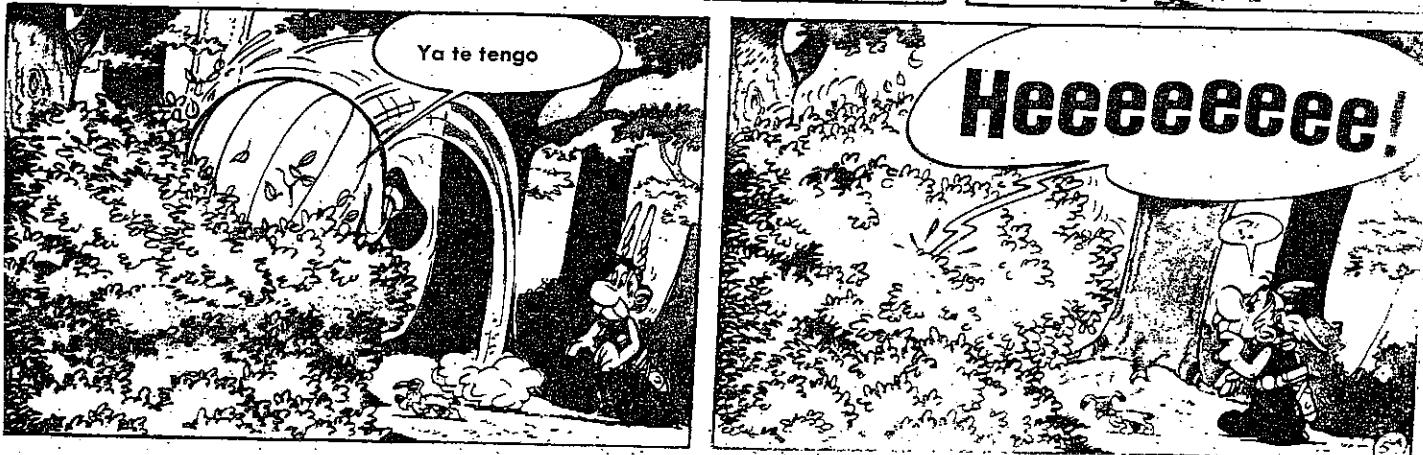

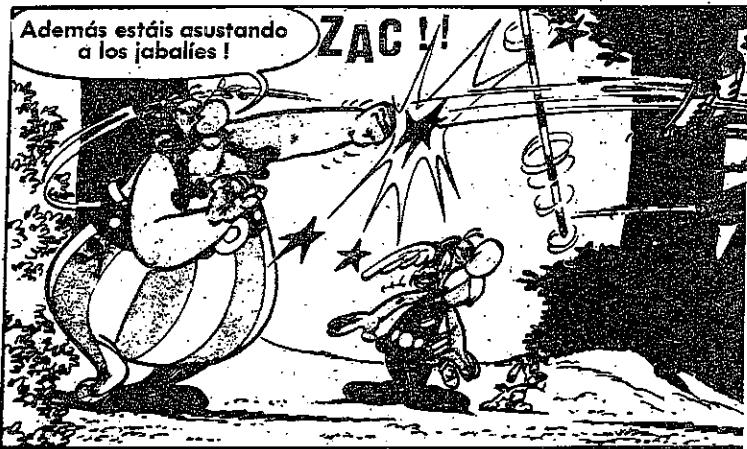

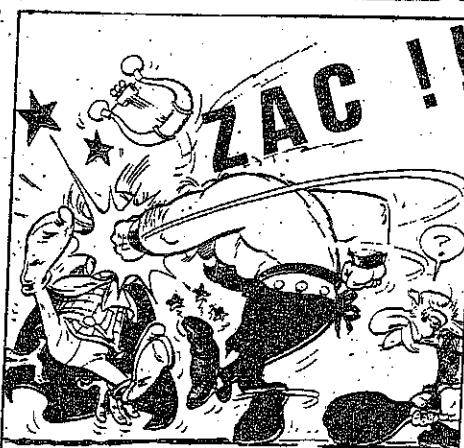

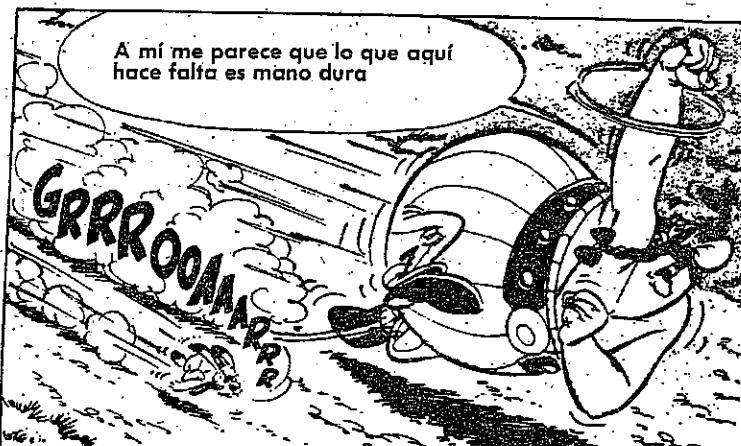

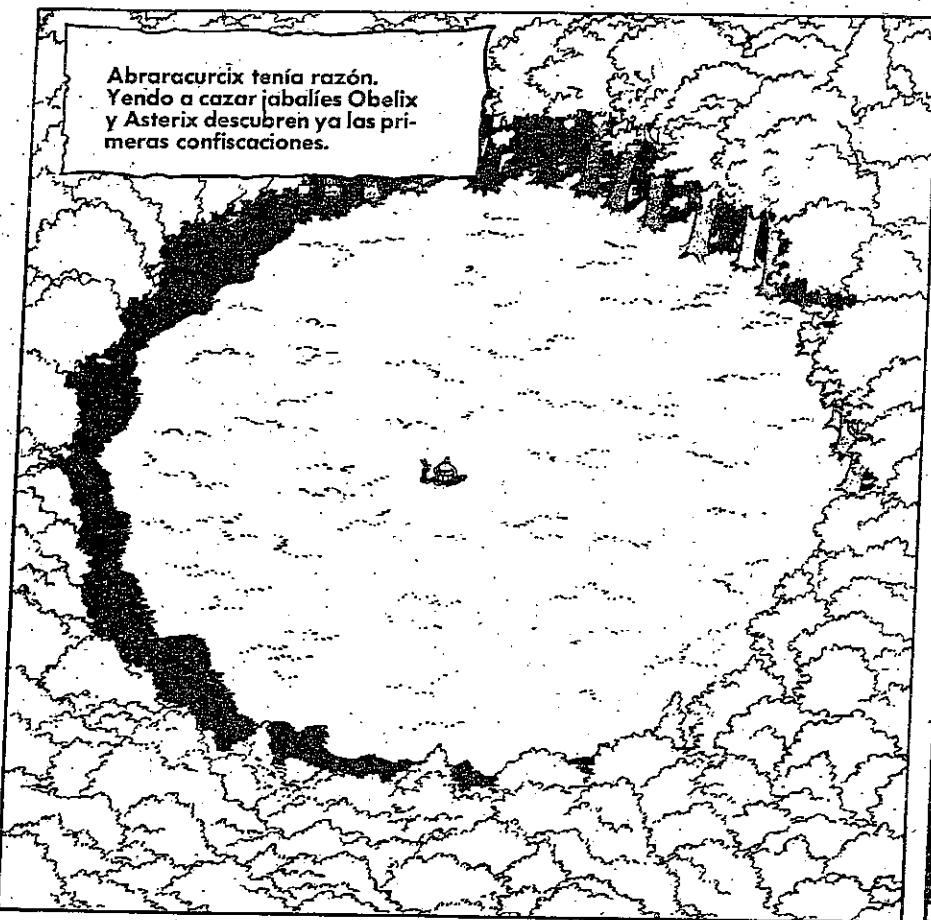

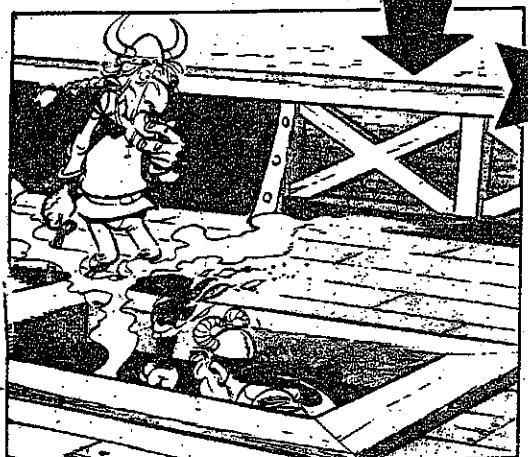

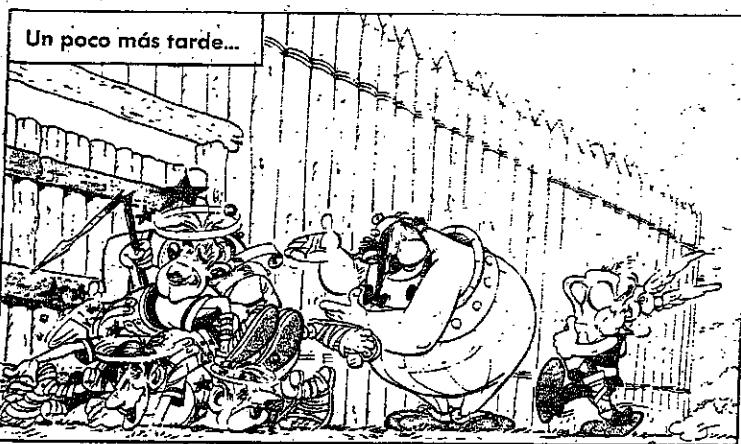

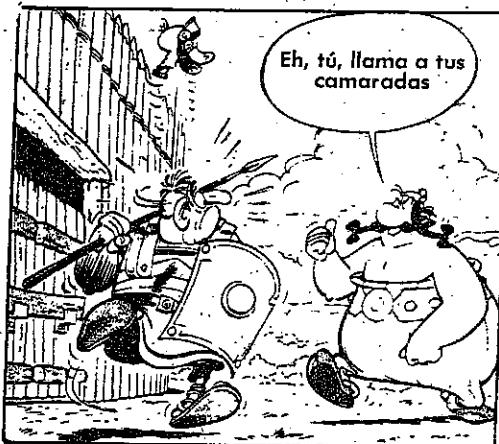

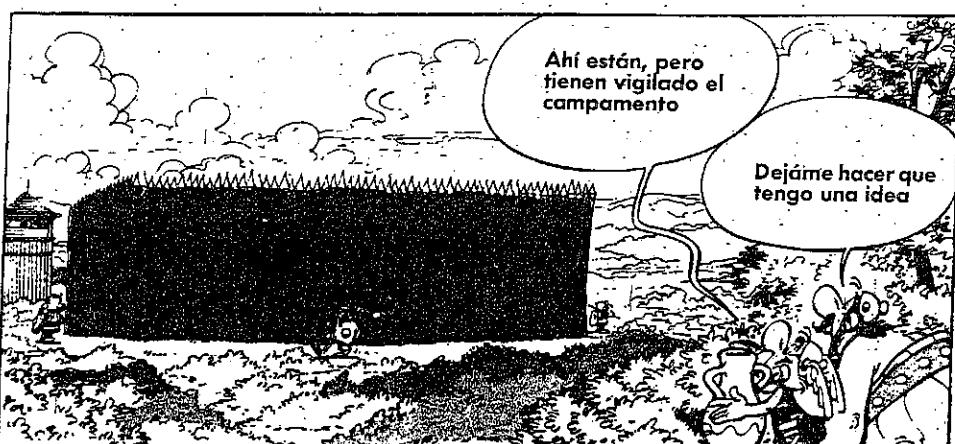

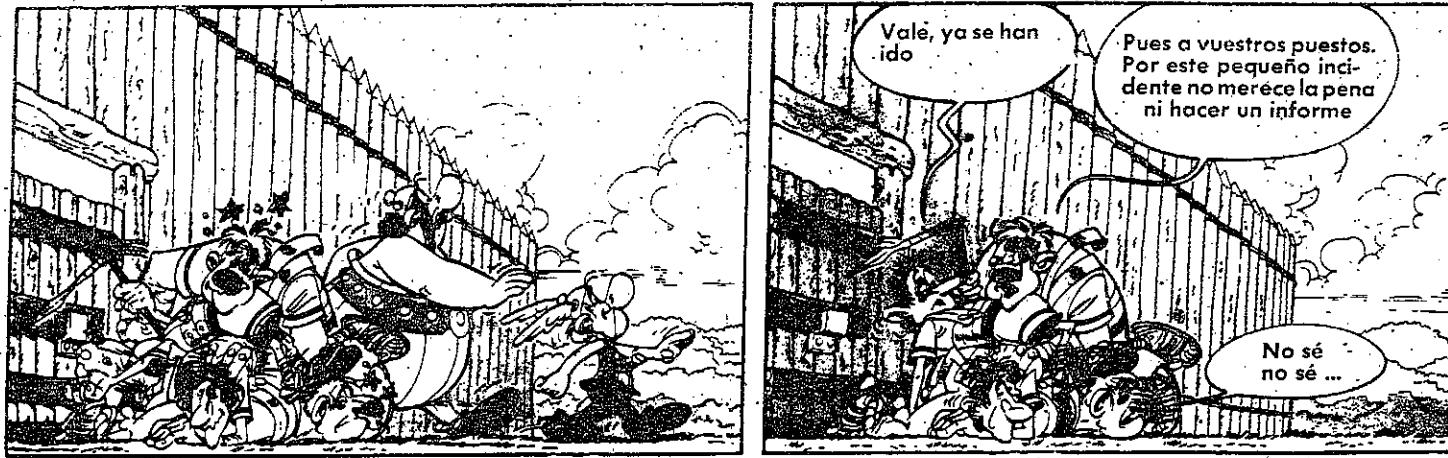

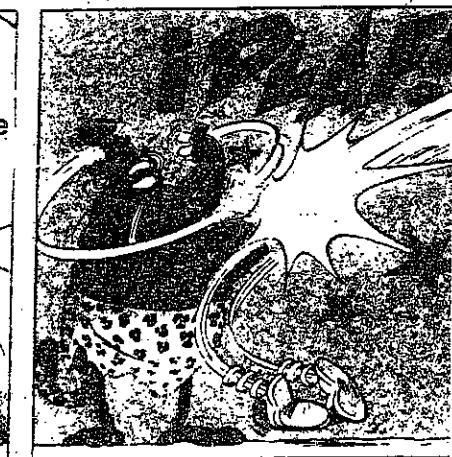

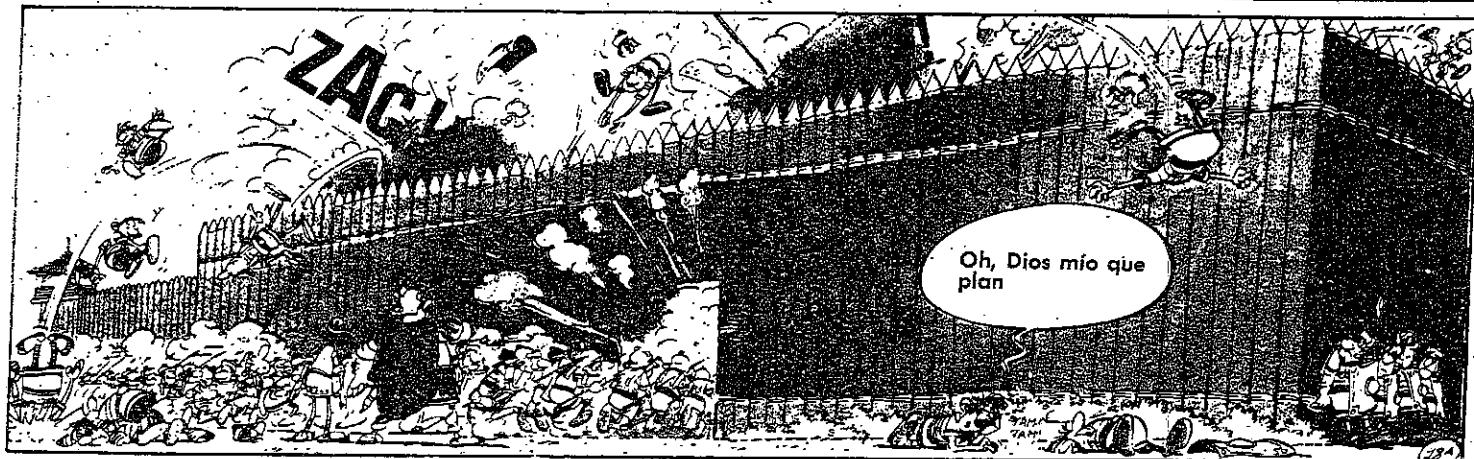

Pues a vuestros puestos.
Por este pequeño inci-
dente no merece la pena
ni hacer un informe

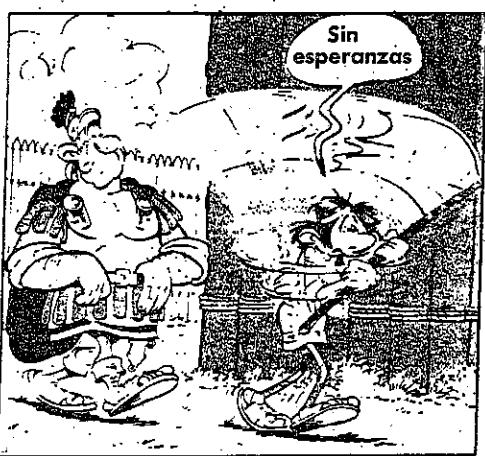

No sé
no sé ...

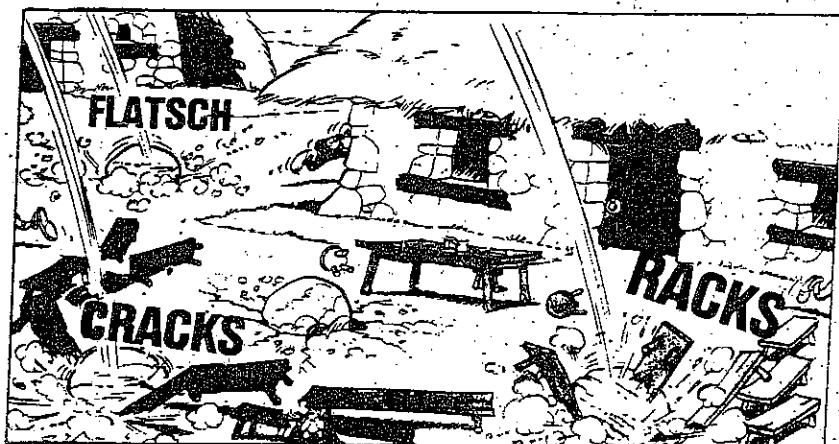

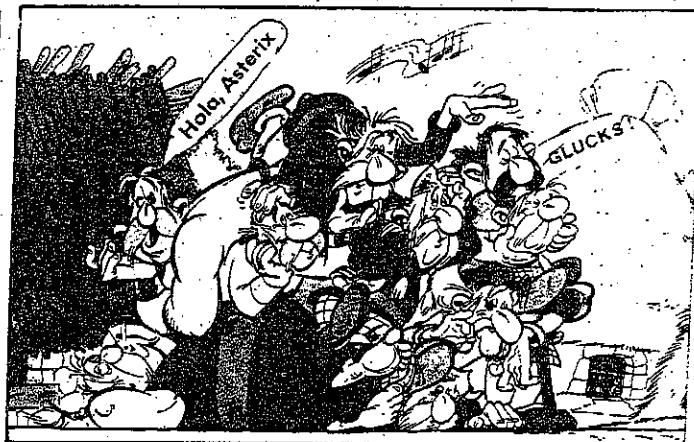

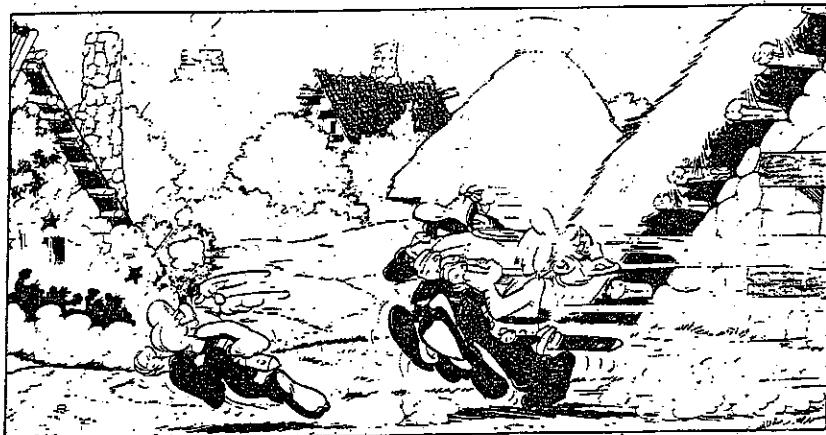

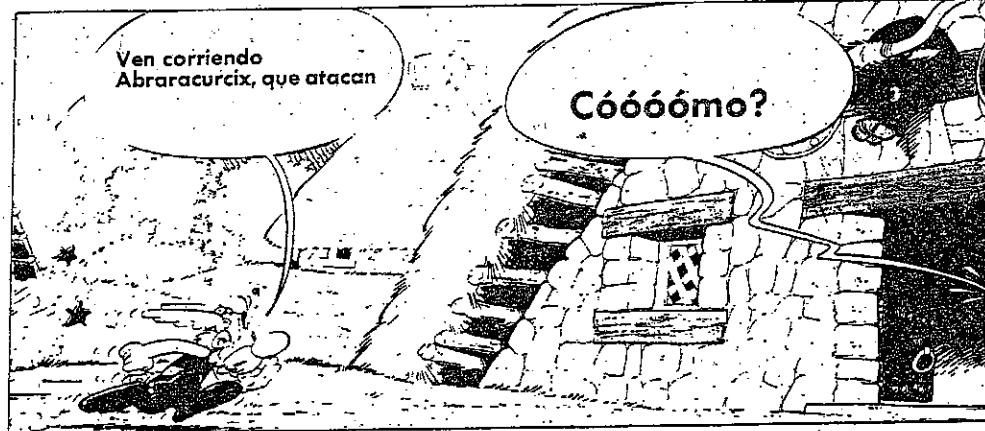

Venid para acá que
Negrozumbón tiene algo
que os dará fuerzas

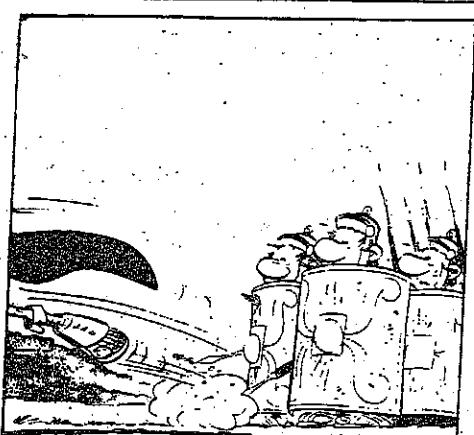

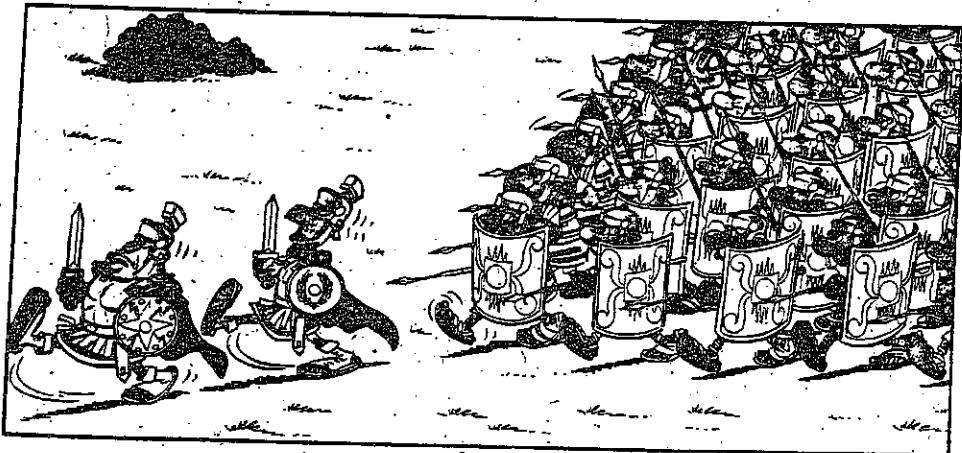

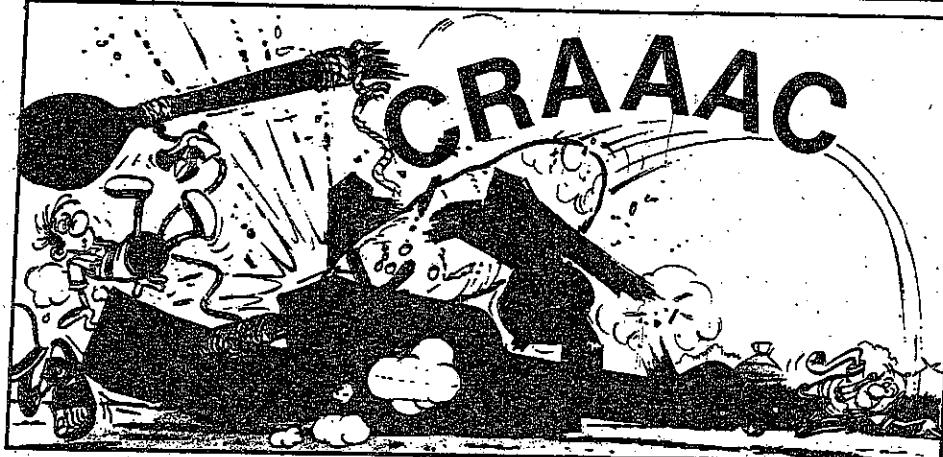

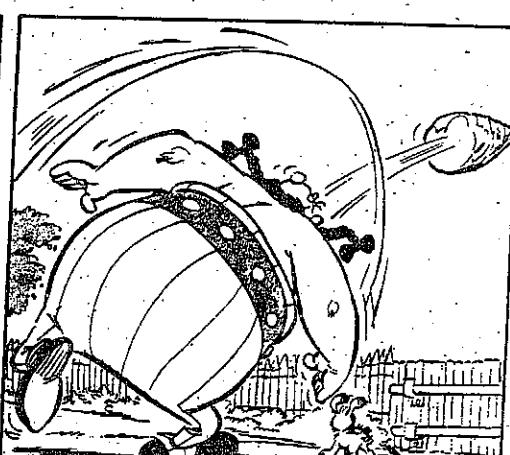

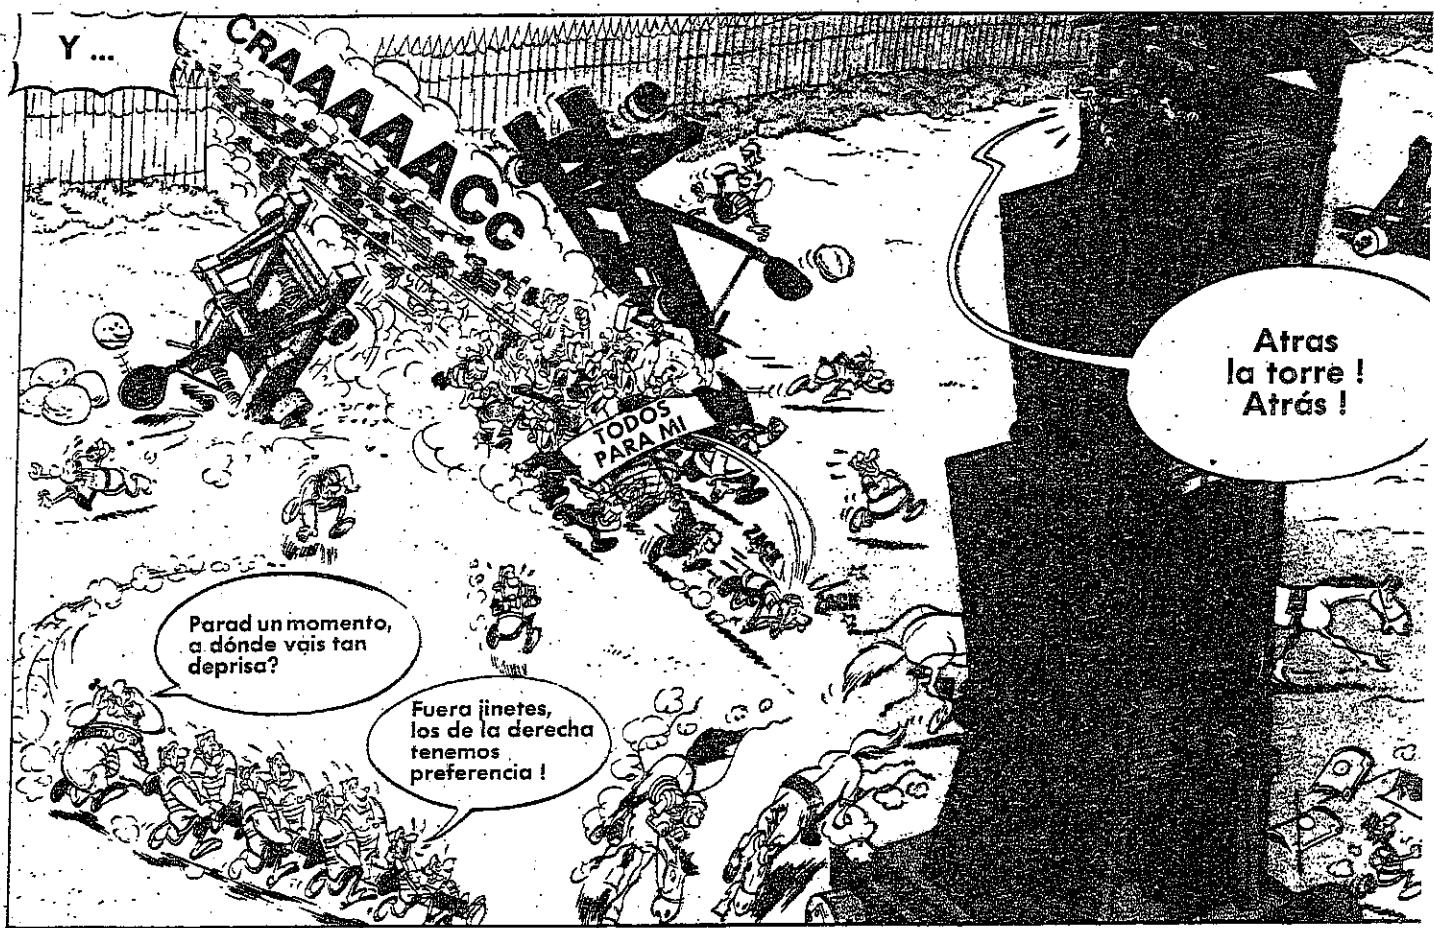

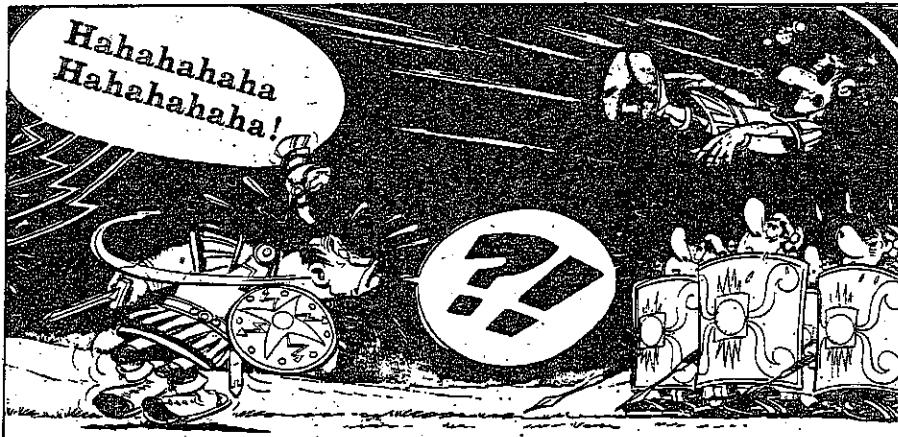

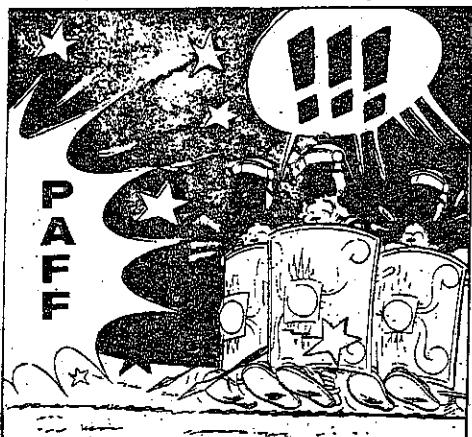

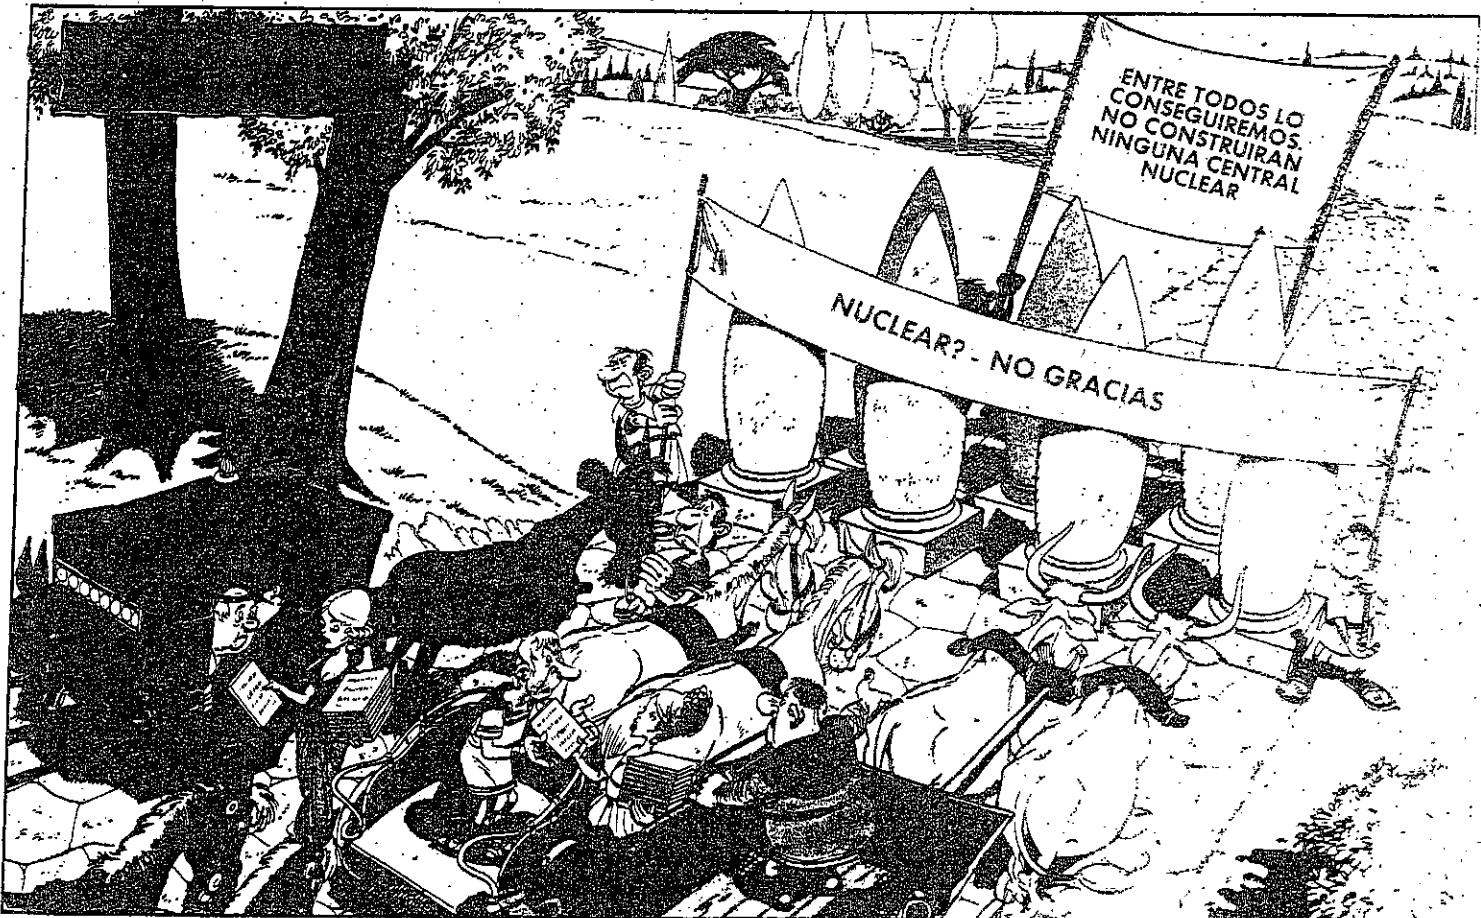

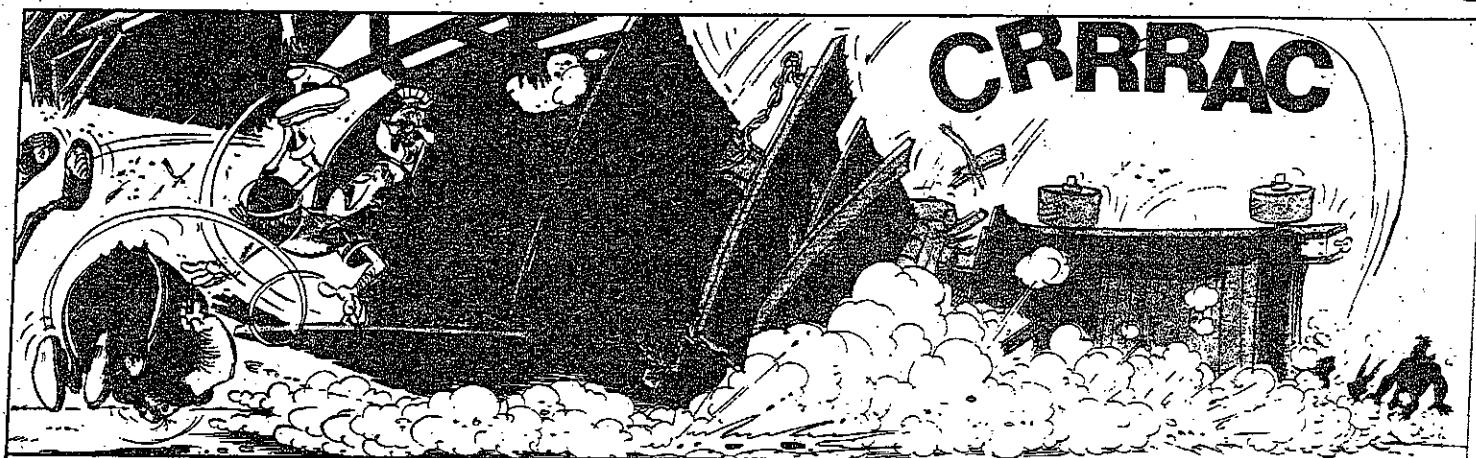

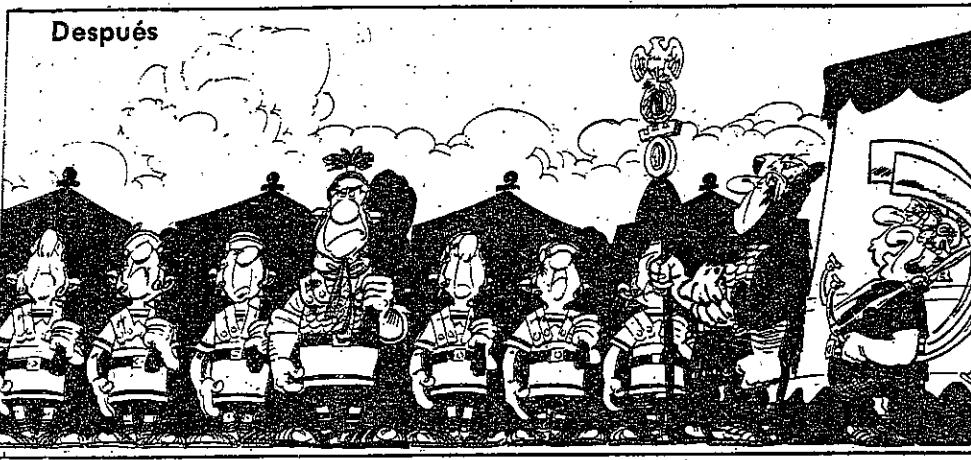

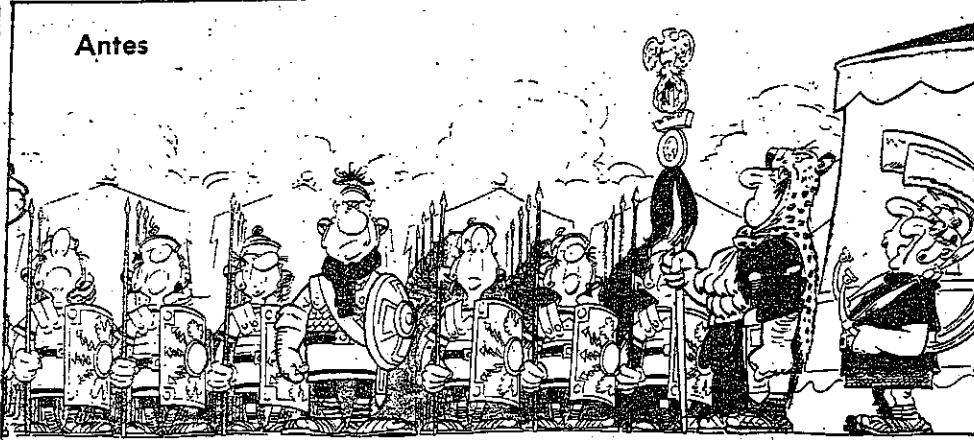

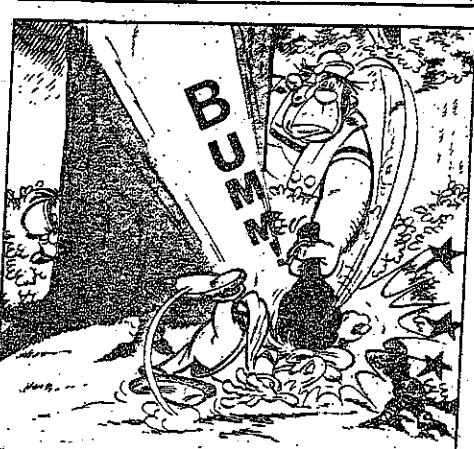

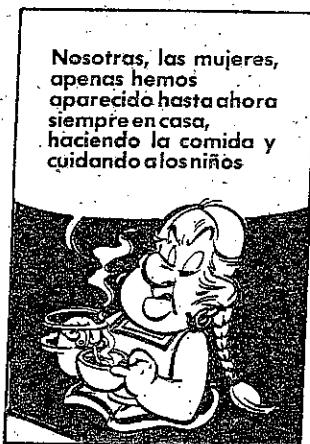

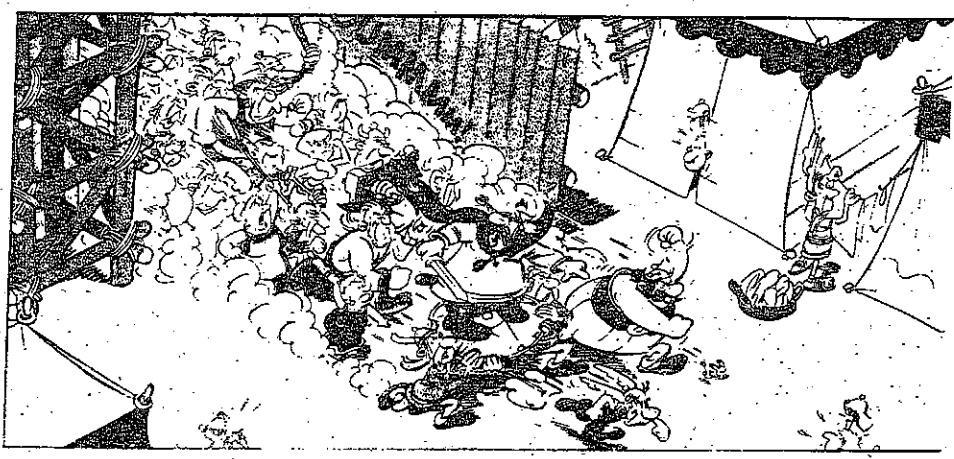

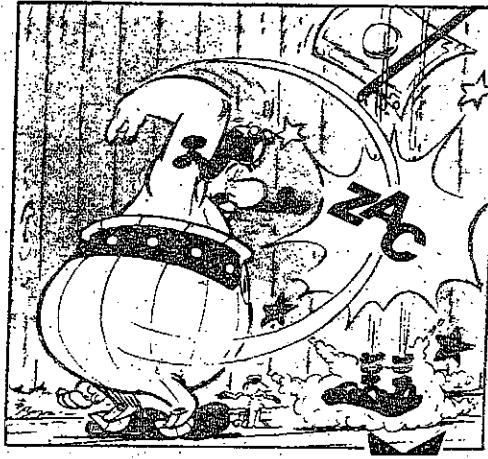

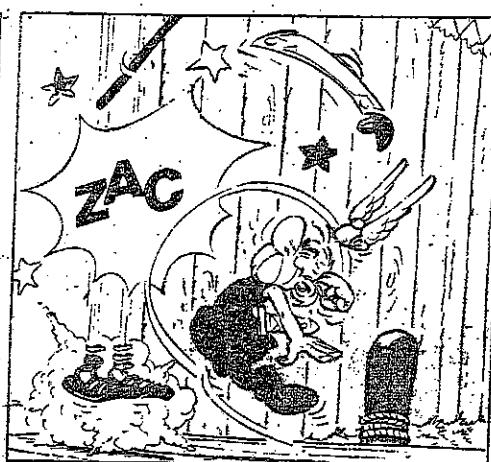

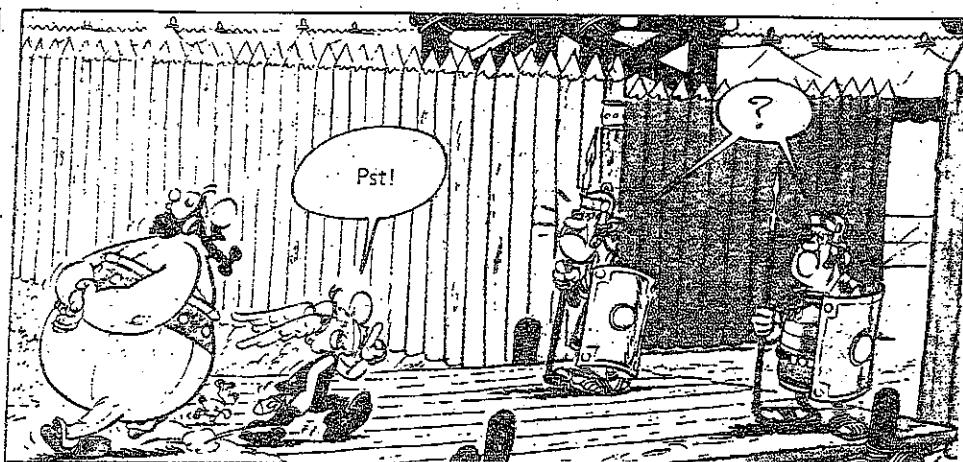

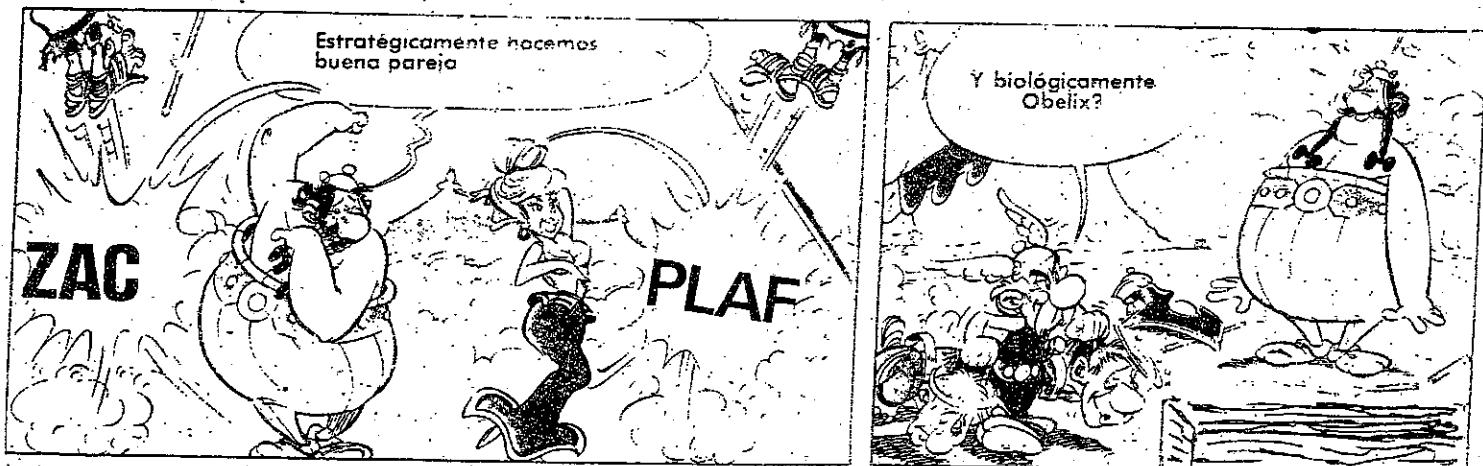

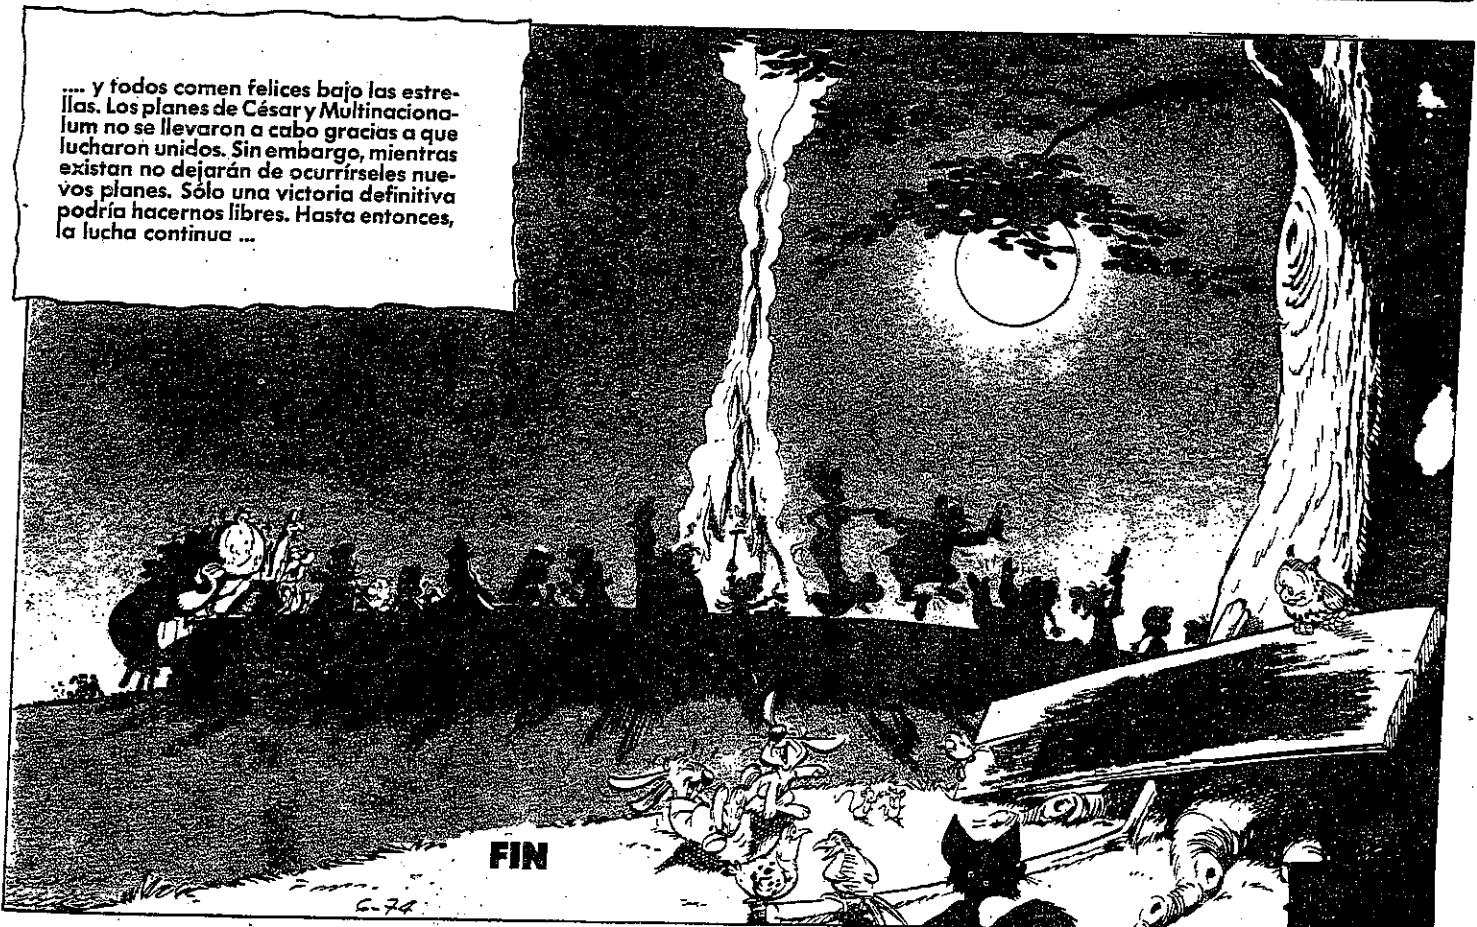

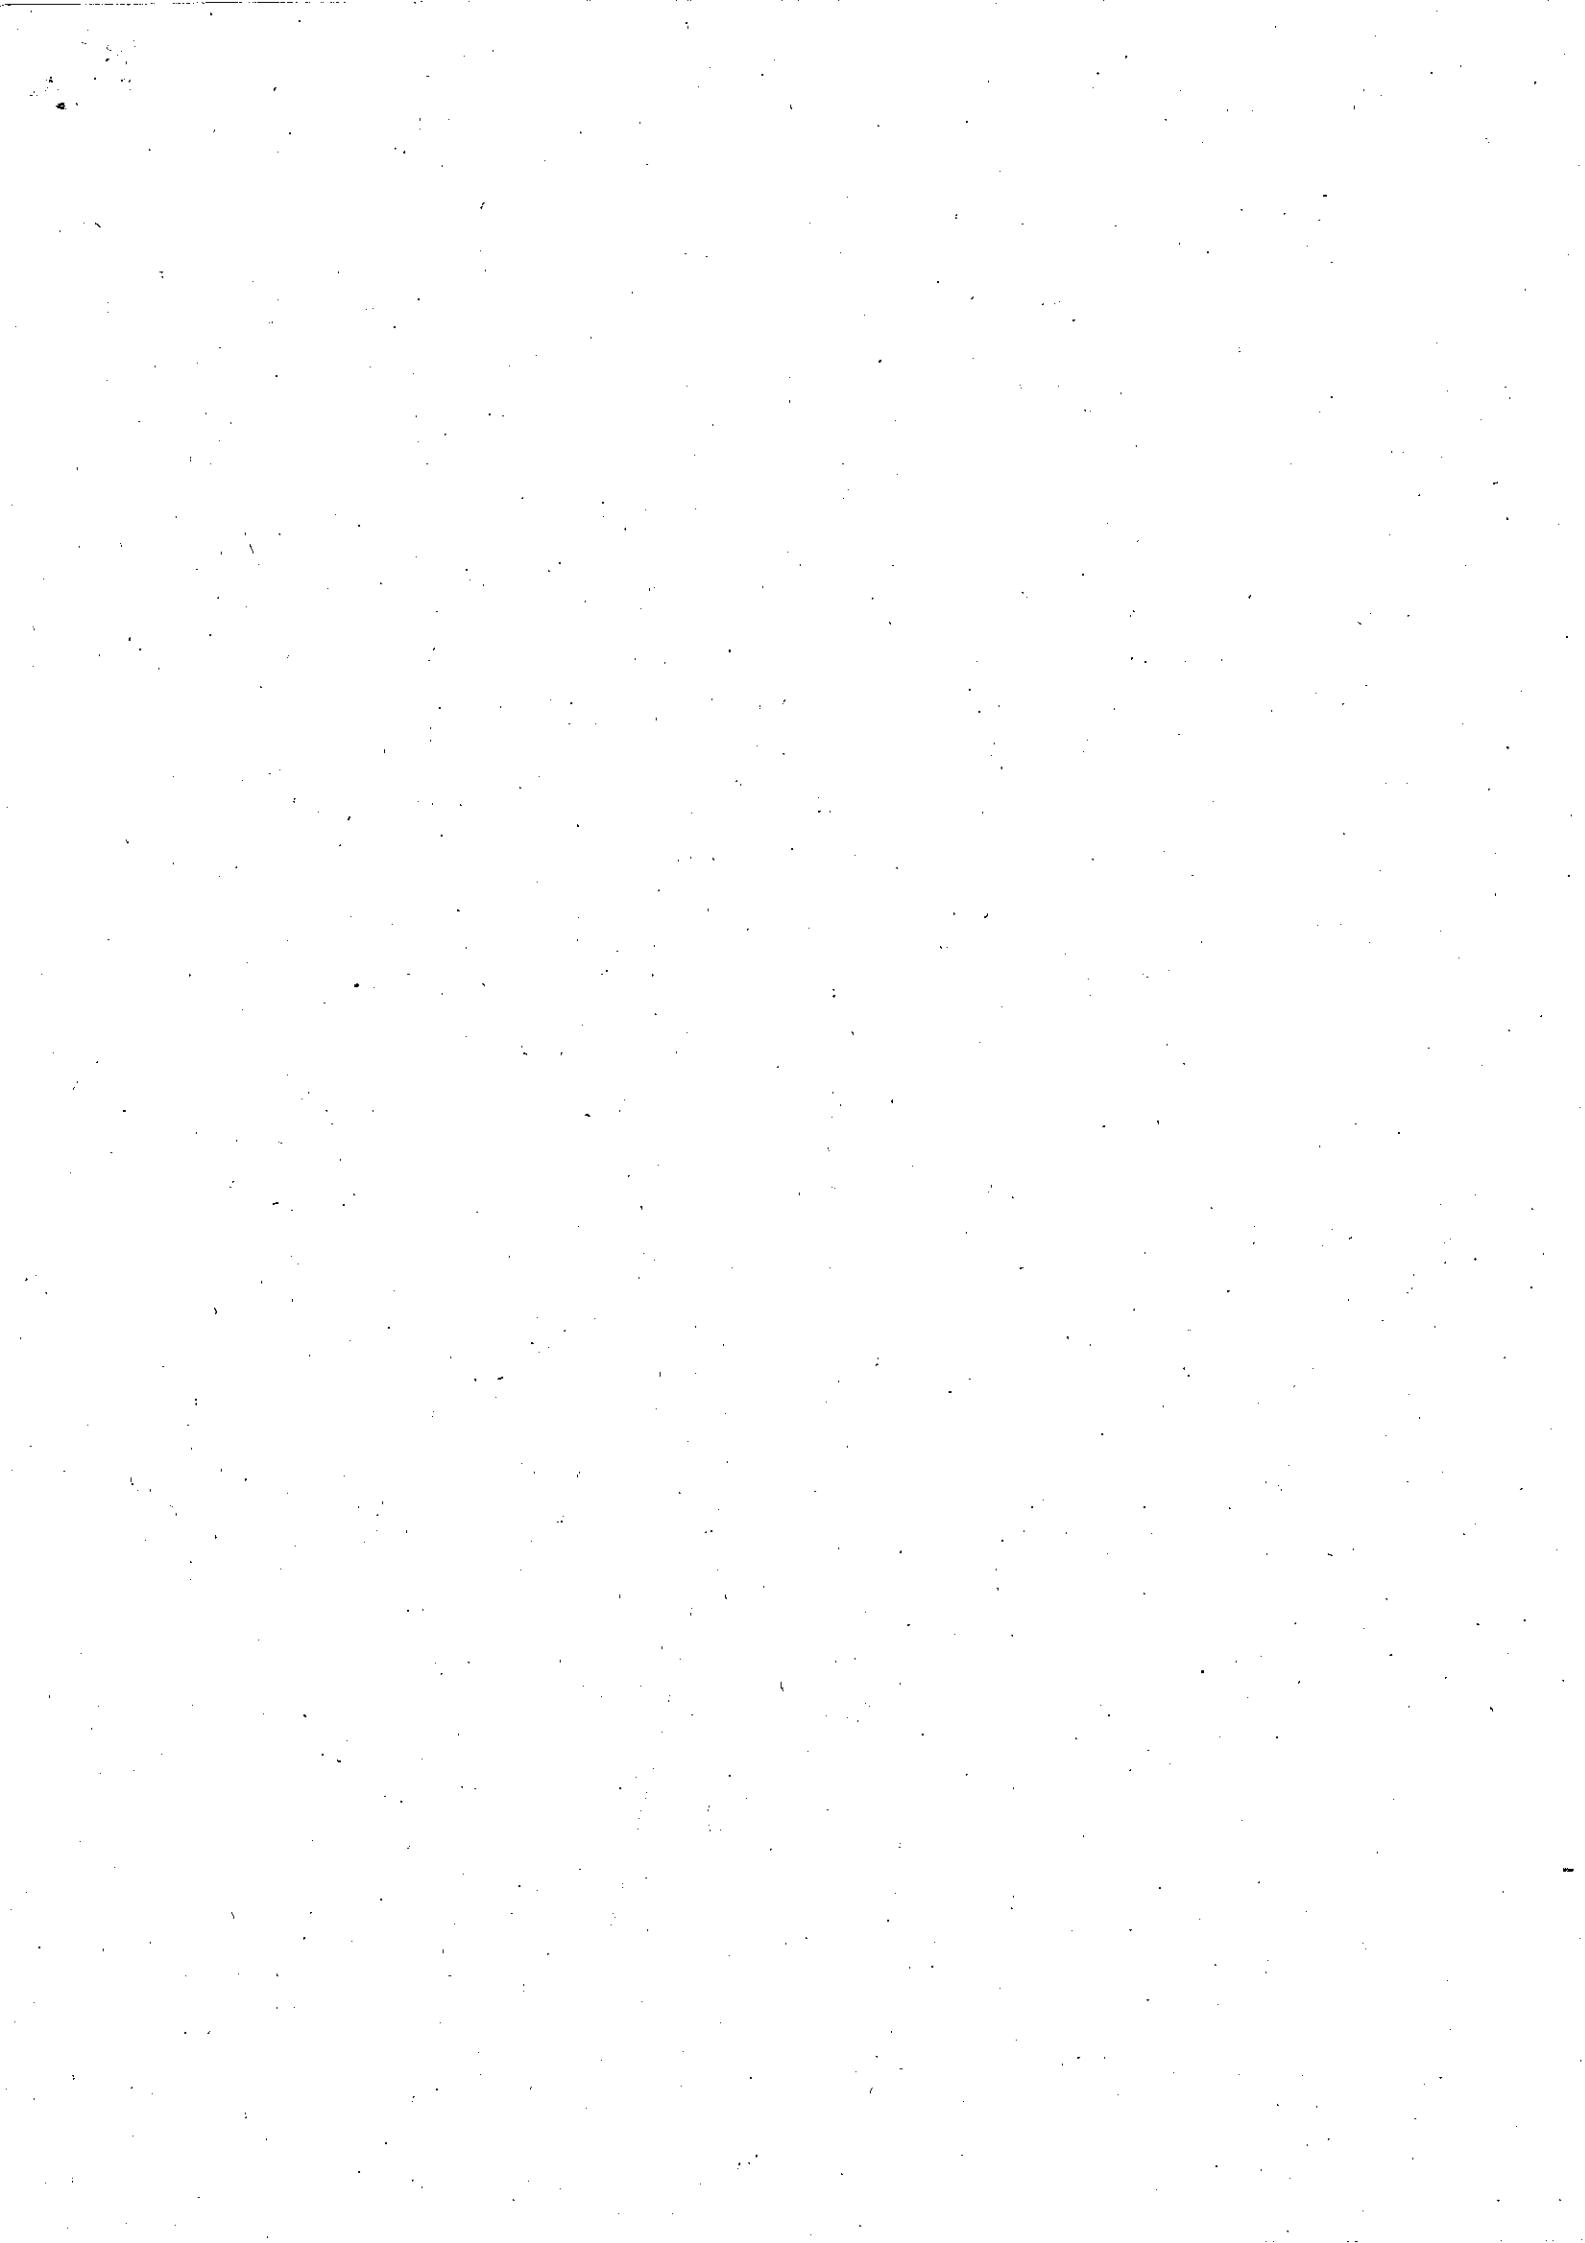

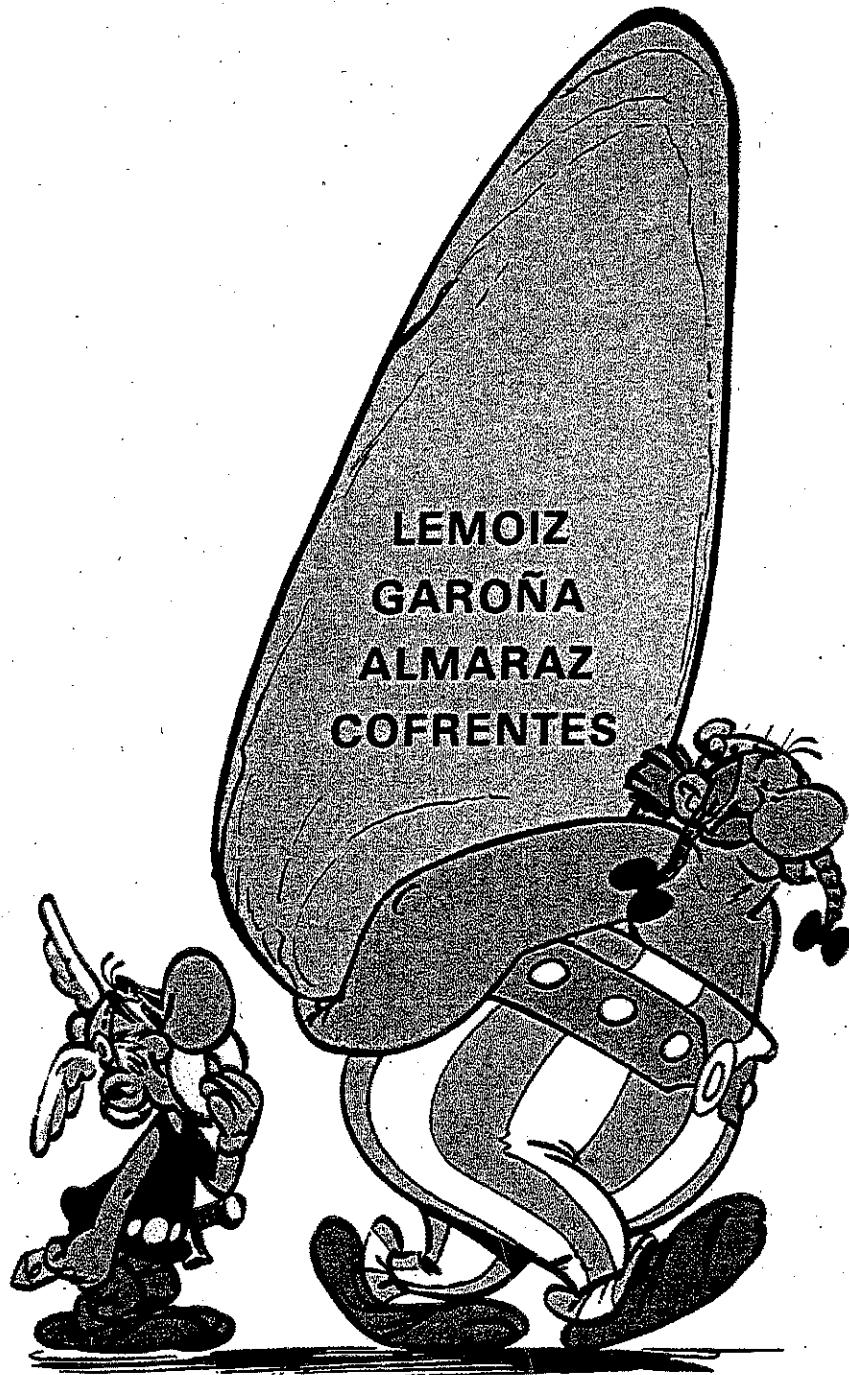

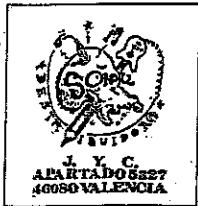

Edita: COORDINADORA ANTIMATERIAL y SOROLL

IMPRESO EN PAPEL RECICLADO.

Cada año, de 7,5 a 20 millones de Ha. de selvas son destruidas o degradadas. Este acelerado ritmo de destrucción conlleva daños de enormes proporciones y de ámbito planetario, y debe detenerse antes de que sea demasiado tarde.

- UTILIZA PAPEL RECICLADO.
- EL VICIO DE "USAR Y TIRAR" ESTÁ ACABANDO CON LOS MEJORES BOSQUES, EN LA NATURALEZA TODO SE RECICLA.
